I	Executive Committee Bylaws	2
---	--------------------------------------	---

Preamble

Purdue IEEE Student Branch has adopted the following bylaws to supplement the Constitution of IEEE.

Article I

Executive Committee Bylaws

BYLAW 1. RAKOS FUNDING DISTRIBUTION ACT

Any funding received from any source that is made out to our IEEE student branch without explicitly mentioning a committee or specific entity (rather on the account statement or other communication) to receive the funds shall adhere to the following procedures.

- The funding shall be split exclusively and evenly between committees who have contacted the company or source for funding or sponsorship within the previous 10 months.
- If no committee has contacted the company within the previous 10 months but has previously received funding from the same company due to previous contact, they shall receive 50% of the funding and the remainder shall be given to the student branch as a whole.
 - If multiple committees have contacted said source prior to the ten month period, then the 50% of the funding shall be split evenly between these multiple committees.
- Otherwise the money shall be given the student branch as a whole.
 - The proceeding point will not prohibit the Executive Committee from voting to redistribute the funding as desired; any such vote is strongly encouraged to split the funds evenly between the technical committees.
